

# LunaBlue® 'FC12-205'

LunaBlue® 'FC12-205' has high yields of very uniform, large fruit that is more resistant to cracking and heat shrivel compared to 'Last Call' and other late-season varieties in our trials. LunaBlue® 'FC12-205' has more fruit in the 16-18mm size class compared to 'Aurora', 'Last Call', and 'Elliott'.

The late bloom timing is advantageous in regions with late spring frosts, and the flowers are highly self-fertile, which could be an advantage when pollinator activity is low.
