

# OlympusBlue® 'TH-1008'

OlympusBlue® 'TH-1008' is exceptional for its high yield and attractive large fruit. This variety has a similar harvest window to 'Ventura' and 'Star' in low-chill environments and is best suited for evergreen growing systems due to the large fruit size in the primocane crop.

The berry is sweet with the right amount of acidity for short or long-distance travel. Selected in Georgia, U.S.A. and tested in southern Spain, this variety is an excellent choice for low chill growing regions.
