

ValentinaBlue® 'FF03-015'

ValentinaBlue® 'FF03-015' was selected for its very early season in low-chill evergreen production systems. The commercial fruit production is 3-4 weeks earlier than 'Ventura,' which is the current early season standard variety. ValentinaBlue® 'FF03-015' has high yields with a balanced flavor.

This variety is not recommended for deciduous production systems and is likely not competitive in no chill where the fruit does not provide an ultra-early season extension.
